DevOps professional with 2+ years designing and delivering production-grade cloud infrastructure, CI/CD pipelines, and GitOps workflows across AWS and Azure — as a Cloud DevOps Trainer building hands-on lab environments and as an independent builder of end-to-end infrastructure projects (EKS, Terraform, ArgoCD, Jenkins). Transitioning from teaching DevOps to practicing it full-time, backed by AWS Certified Solutions Architect – Associate and a portfolio of self-built, IaC-driven cloud systems.

SKILLS

Cloud :	AWS (EKS, ECS, EC2, S3, IAM, VPC, CodeDeploy, CodePipeline) Azure (VNet, AKS, RBAC)
IaC & Config :	Terraform (modules, remote state) Ansible
Containers:	Docker Kubernetes Amazon EKS AKS
CI/CD :	Jenkins GitHub Actions Azure DevOps ArgoCD
Monitoring & Security:	Prometheus, Grafana, CloudWatch SonarQube and Trivy
OS & Scripting :	Linux (RHEL, Ubuntu) Bash/Shell Scripting Git

TECHNICAL EXPERIENCE

DevOps Engineer & Trainer – Dec 2025 — Present

IT VEDANT, Thane, India

- Architected multi-tier AWS lab environments using Terraform modules and Ansible playbooks, cutting environment provisioning time by 80% and achieving fully reproducible builds across dev, staging, and production-equivalent lab tiers
- Standardized CI/CD teaching workflows using Jenkins and GitHub Actions, cutting lab-to-deployment cycle time from days to under 2 hours
- Mentored 150+ engineers on cloud architecture, secure design, and fault-tolerant infrastructure patterns, translating production-grade practices into hands-on curriculum

Technical Trainer March 2025 — Nov 2025

Jet-king, Thane, India

- Configured and optimized Azure and AWS infrastructure, including networking, IAM, and compute resources.
- Designed secure virtual network architectures (VNet, subnets, SGs) for multi-tier applications. Implemented identity and access management using RBAC. Reduced system downtime through proactive monitoring and troubleshooting.

Cloud & DevOps Trainer Jan 2024 — March 2025

Nettech India, Mumbai, India

- Designed and automated IaC-based lab environments using Terraform, Docker, and Kubernetes.
- Built and demonstrated end-to-end CI/CD pipelines as teaching reference implementations, later adopted as course curriculum.
- Mentored 100+ learners on production-style DevOps workflows and cloud-native architecture design.

PROJECTS

Municipal Complaint Platform on AWS EKS [link](#)

- Deployed a Flask-based citizen complaint portal (with an ML model for auto-priority classification) on Amazon EKS, provisioning the entire environment — VPC, EKS cluster, RDS (PostgreSQL), and a jump server — 100% as code using Terraform
- Built a Jenkins CI/CD pipeline on the jump server that builds Docker images, pushes to Amazon ECR, and deploys to EKS via kubectl on every GitHub push.
- Integrated S3 (image storage) and SNS (email notifications) for a fully cloud-native application backend spanning 5 AWS services.

CartForge — Canary Deployments on ECS Fargate [link](#)

- Built a zero-downtime release pipeline for a containerized app on ECS Fargate: Jenkins → ECR → ECS Fargate → CodeDeploy canary traffic shifting, with CloudWatch alarm-triggered automatic rollback and Prometheus/Grafana monitoring on every deployment
- Instrumented Prometheus and Grafana for real-time deployment health visibility across simulated release cycles

Bazaario — Cloud-Native E-Commerce Platform on AWS EKS [link](#)

- Built an end-to-end GitOps deployment pipeline on Amazon EKS using Terraform and ArgoCD, automating 100% of AWS infrastructure provisioning and managing Kubernetes application deployments entirely through Git-driven workflows
- Implemented automated sync, configuration drift detection, self-healing, and rollback to improve deployment reliability and operational consistency

EDUCATION

Master of Computer Application (MCA), Mumbai University

Bachelor of Science in Information Technology(Bsc-IT) Bunts Sangha College, Kurla

Pursuing
2023

CERTIFICATIONS

AWS Certified Solutions Architect – Associate [Link](#)
